PROFILE SUMMARY

Certified MERN/MEVN Full Stack Developer and AI engineer with 3+ years of experience across **software engineering, DevOps, and applied AI**, and an **MVP specialist** who **designs data-heavy systems** and has taken products from zero to production as a founding engineer. Builds **agentic and generative-AI** solutions (an **anomaly-detection AI agent**, **AWS Textract/Rekognition** OCR automation, **OpenAI** and **Gemini** integrations) backed by **data pipelines** that process **~1.2M smart-meter data packets a day** (**Airflow**, **S3**, **ClickHouse**, **Athena**). Delivered a real-time solar monitoring system with **40% data latency reduction** and **99% uptime**. Proficient in **JavaScript, TypeScript, Node.js, React.js, Vue.js, MongoDB, MySQL, GraphQL, Docker, AWS, GCP, CI/CD**, Agile development, and Git.

EXPERIENCE

Trillectric Gridmend Pvt. Ltd.

Senior Founding Engineer

Remote, India

Sep 2024 – Present

- **Data-Heavy Systems & Smart-Meter Pipelines:** Designed and built **data-heavy systems** for about **25,000 smart meters** sending ~48 data packets each per day (**~1.2M packets daily**), using **Apache Airflow** for orchestration, **S3** for storage, **ClickHouse** and **Athena** for analytics, and **APIs** serving the data.
- **AI Agent for Anomaly Detection:** Currently developing an **AI agent** that identifies sensor failures, production outliers, and data inconsistencies in real-time streams.
- **Real-Time Solar Monitoring System:** Engineered a full-stack **MERN** solution with Node.js backend and React.js/Cordova frontend; integrated **Modbus-based IoT sensors** via **Socket.io** to capture real-time data, reducing latency by **40%**; built **Chart.js** dashboards; maintained **99% uptime**.
- **AI-Powered Enhancements:** Built **AWS Textract/Rekognition** OCR-driven automation and **Gemini-based geolocation extraction** to enrich real-time analytics.
- **API Development & Integration:** Led a team of 4 developers to architect scalable **REST** and **GraphQL APIs** using Node.js/Express.js; integrated third-party solar and environmental APIs to enhance analytics.

Codalien Technologies

Software Engineer

New Delhi, India

Sep 2023 – Sep 2024

- **AI-Powered Blog Writer Application:** Developed a prompt-driven AI blogging tool with **OpenAI API** and **WordPress API** publishing; enforced code quality with **ESLint** and **Nodemon**; accelerated content output by **50%** and cut input errors by **80%**.
- **Influencer Marketing Platform:** Architected backend using **MongoDB** with aggregation pipelines to boost query performance by **40%**; implemented **Nuxt.js/Vue.js** frontend watchers, reducing UI latency by **25%**.
- **Import-Export Management Platform:** Designed robust **MongoDB schemas** with Mongoose pre-/post-hooks for validation automation; built modular backend and **Vue.js** dashboard; cut manual data entry by **60%** and improved load speed by **35%**.
- **Short Video Streaming App (Vue.js, GraphQL, Cordova):** Launched a mobile streaming app with real-time comments, deep linking, and likes/reactions; architected and secured **GraphQL APIs**, boosting onboarding efficiency by **40%** and reducing data errors by **25%**.
- **EdTech Platform (React.js, Redux):** Modernized an EdTech portal with **multi-step forms** and Excel uploads; standardized application state with **Redux**; with QA, cut post-release defects by **20%** and integration time by **30%**.

Easexpense

Full Stack Developer

Noida, UP, India

Feb 2023 – Sep 2023

- **UI Development & API Integration:** Built a responsive **React.js** UI, improving usability by **40%**; optimized **MySQL** schemas; developed **RESTful APIs** with Node.js/Express.js, reducing load time by **30%**.

PROJECTS

- **WhatsApp Marketing Platform:** Built a **Brevo-style marketing platform** around **WhatsApp**, for reaching customers directly on the channel they already use.

SKILLS

- AI & LLMs: Agentic AI, Generative AI, OpenAI API, Gemini API, AWS Textract, AWS Rekognition, anomaly detection
- Data Engineering: data-heavy system design, Apache Airflow, ClickHouse, AWS Athena, Amazon S3, data pipelines, MongoDB, MySQL, Mongoose
- Frontend: React.js, Vue.js, Next.js, Nuxt.js, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS
- Backend: Node.js, Express.js, JavaScript, TypeScript, GraphQL, RESTful APIs, Keystone.js, JWT, Socket.io, IoT/Modbus
- DevOps & Deployment: Docker, CI/CD, AWS (Lambda, IoT Core, S3), GCP, Nginx, Git, GitHub, Yarn, Webpack, Agile

EDUCATION

Jamia Millia Islamia

Bachelor of Technology (B.Tech), CGPA: 8.7

New Delhi, India

Aug 2019 – Jun 2023
